

**Remarks/Arguments:**

The above Amendments and these Remarks are in reply to the Final Office Action mailed November 2, 2007 and the telephone interview on November 29, 2007.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ng, et al. (US Patent 6,285,366) in further view of Brassard et al. (US Patent 6,769,095) and Microsoft Windows ("Windows Explorer") copyright ©1981-2001.

Claims 1, 7, 11, 17 and new claim 24 have been amended to include the feature that

“the context sensitive editor is different for different selected nodes and wherein when a top portal node is selected, the context sensitive editor allows for the creation of a new portal, the new portal being associated with a new node in the hierarchy below the top portal node and wherein when a specific portal node below the top portal node is selected, the context sensitive editor allows for inputting field data concerning the specific portal”.

This feature is not believed to be shown or made obvious by the cited references.

For the above reasons, these claims are believed to be allowable.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: December 3, 2007
